

**Chapkin Lab Seeks Microscopist  
Program in Integrative Nutrition & Complex Diseases  
Laboratory of Dr. Robert Chapkin**

Chapkin Lab on the Texas A&M College Station campus has a position open for a research microscopist to oversee our fluorescence microscope facility. Job duties include:

- Coordinating membrane biology/microscopy imaging experiments
- Overseeing the training of graduate students and lab staff
- Maintaining imaging data storage capabilities
- Designing and conducting research projects
- Writing manuscripts based on data generated

Required Education and Experience

B.S., M.S. or Ph.D. in a relevant discipline with considerable microscopy experience.

Salary is commensurate with education level and experience. A competitive benefits package is included.

**The Chapkin Lab has been continuously funded by NIH for the past 33 years.  
Please submit your CV to: Dr. Laurie Davidson at [L-davidson@tamu.edu](mailto:L-davidson@tamu.edu)**
